Product Information Sheet

Cardio Essentials®

Description

CardioEssentials combines nutrients that are particularly important for healthy heart muscle function. Studied in congestive heart failure (CHF) patients, CardioEssentials has been shown to improve the condition of these patients by decreasing left-ventricular size, and end-diastolic volume, two risk factors for complication in heart patients.

Ingredients per daily dose.

Name	Amount	Function
Coenzyme Q-10	100 mg	Important co-factor in energy production, particularly for the heart that consumes a lot of energy
Proprietary Blend	35 g	
L-Carnitine		Important to convert fatty acids into energy in the mitochondria
L-Taurine		Aminoacid of which concentration is decreasing in heart diseases
Hawthorn berry		Promotes heart beating, improves ejection fraction
